

BE SURE IT FITS

WILL YOUR FURNITURE FIT?

When purchasing new furniture it's important to check if the pieces you've chosen will actually fit into the home. A staircase with an angle, a narrow hallway or a small elevator can present a challenge. With this tool we hope to give you some tips to help you determine in advance if an item will fit into the home.

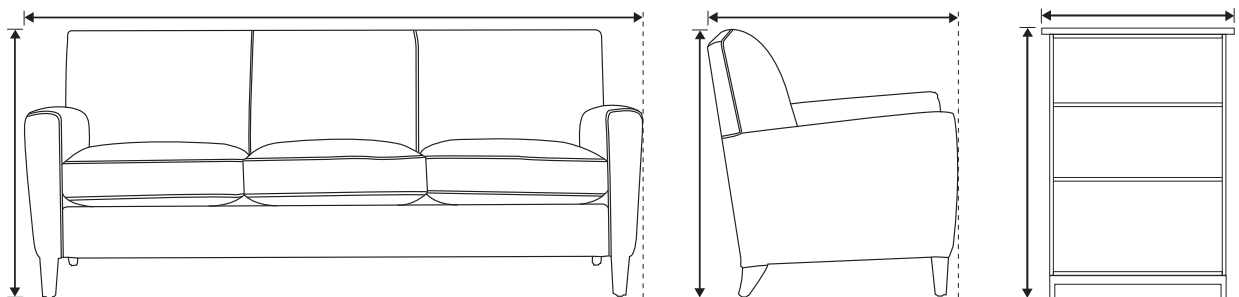

MEASURE YOUR SPACE

- 1 Measure the heights Ⓐ and widths Ⓑ of entryways and hallways both inside and outside the home.
 - 2 Measure your entry clearance Ⓒ— the distance from the wall, through the doorway to the opposite wall.
 - 3 Factor in ceiling height Ⓓ, stairways Ⓔ, banisters Ⓕ, corners Ⓒ, and low hanging lights Ⓖ.
 - 4 Determine the best pathway from outside the home to the room where the new piece(s) will be placed.
- Please be sure to account for any architectural details when taking measurements.

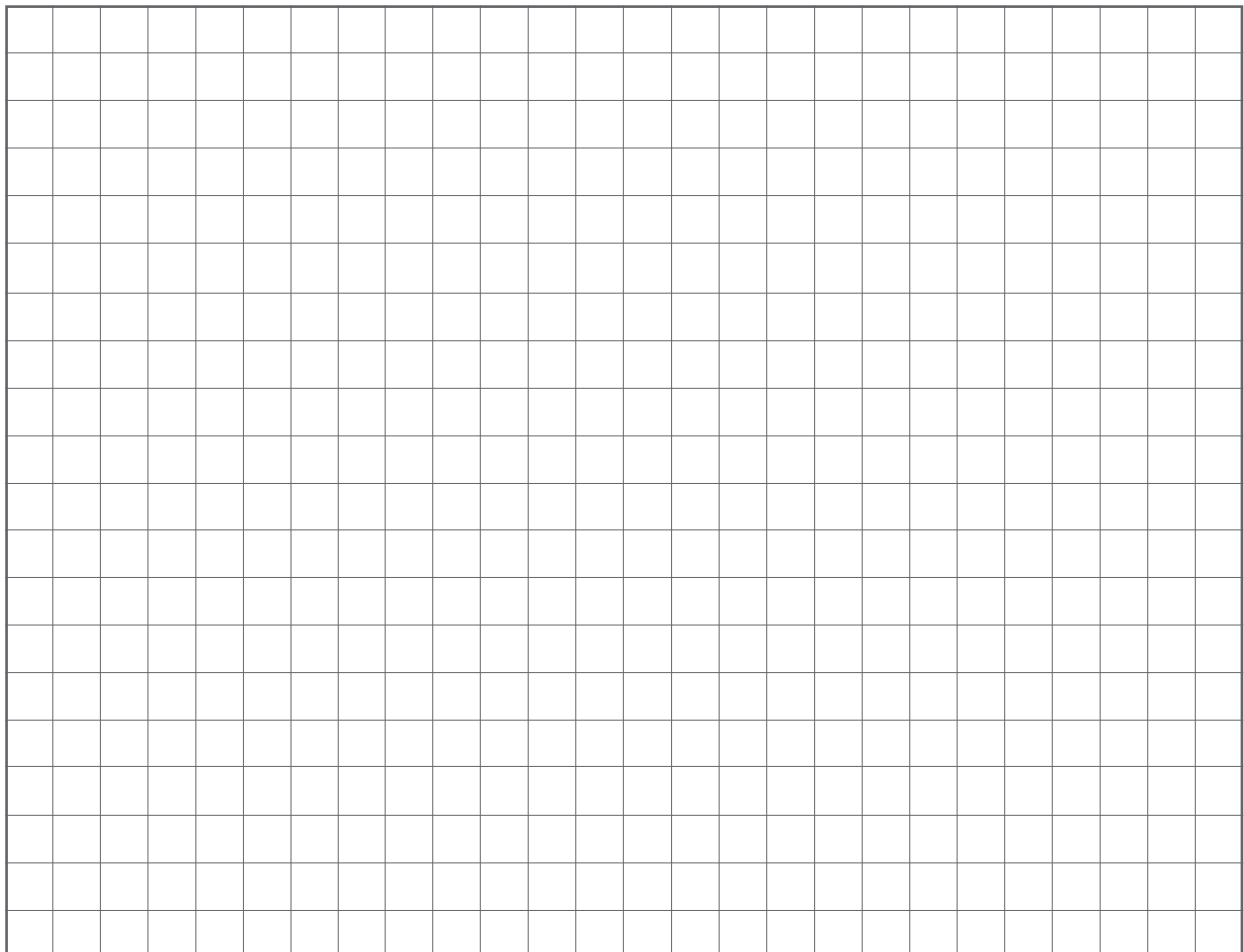

GET MEASUREMENTS OF THE NEW FURNITURE

- The width, depth and height of all our furniture is listed in each manufacturers' product details.
- Some of our furnishings have removable legs, feet or bases, for delivery through smaller spaces. Please check with a KDR Sales Associate.
- Our furniture measurements are calculated from each piece's widest or tallest point. This means items with an overhang, angle or outward curve are included in the overall dimensions.

CONSIDERATIONS

- Before delivery, the client should remove any frames or artwork from walls to avoid bumps and scratches.
- Remove any potential obstacles between the door and the furniture's final placement—plants, chairs, accent tables, etc.
- Please confine pets to ensure they won't be underfoot or escape out open doors.
- If the project is in a building with an elevator, measure the height of the door, as well as the inside space to ensure it's big enough for the furniture to travel in.
- Cut out a cardboard template in the size of the new furniture or using masking tape mark off the area on the floor to help envision how it will fit in the room.

KDR Delivery Services in St. Louis can measure for you at a job site and in other locations most receiving companies offer measure services as well. Contact your KDR Sales Associate with any questions.
