2016 REFERENCE GUIDE KIT

The NEW Reference Guide Kit has arrived and offers a comprehensive resource for design inspiration, a detailed look at materials, product specifications and pricing for shades and wood blinds.

Email us at windows@kdrshowrooms.com to request your complimentary copy.

SAFETY BY DESIGN™

Hartmann&Forbes has created the Safety by Design™ initiative as a demonstration of their ongoing commitment to providing safe shading solutions.

- All products meet or exceed guidelines prescribed by the American National Standards Institute (ANSI) and the Window Covering Manufacturers Association (WCMA).
- Ongoing research promises innovative solutions that will improve shading safety.
- The use of natural materials eliminates hazardous materials that may off-gas and cause poor indoor air quality.

REMINDER: Take the time to urge parents and caregivers to check their window coverings for exposed or dangling cords that can pose a strangulation hazard to infants and young children. Ask a KDR associate for safe solutions from our window shading lines.
